I am Soumya Prasad. Please allow me to introduce myself. I am an engineer from India with consistently good academic record. I have recently moved to Stockholm, but previously, I have worked for several years in Schneider Electric, Honeywell and GE.

In my previous roles, I was working in testing industrial automation software. I was doing acceptance and exploratory tests. I have written scripts for automated testing with TestComplete and Selenium. I have worked in agile projects and diverse teams. Also closely interacting with development teams during the entire process. The teams have sometimes been international, both big and small.

I am currently looking for roles involving product management. I am passionate about building the right products and I believe I can leverage my previous experiences.

I find Klarna interesting because it seem like a fun place to work (from what I see on Instagram). I also know I will be working with highly skilled workers, from KonferenSE videos. I can even think of a tagline for Klarna - lovable payments!

I am new to Stockholm and Swedish but I am quickly learning the language!
