Talent Acquisition
Symphony, Stockholm

Hello!

I am Soumya Prasad. Please allow me to introduce myself. I am an engineer with almost 10 years of experience in various areas of product testing.

I currently work as a QA Engineer at Cabonline Technologies AB, Stockholm working with automating end-to-end tests for several ReactJs applications. I also focus on quick and lean integration of the tests into existing CI pipelines, while dockerizing the test environments, to reduce dependency on devOps.

I find this opportunity of working as Test Automation engineer at Symphony- as the next stage in my testing career, since I aspire to start building test infrastructure to enable quick, automated feedback on crucial integrations, whilst ensuring response reliability and performance of backend APIs. I have worked with REST/Websocket API test automation previously and enjoy it! I am familiar with Jenkins environment and understand the importance of end to end tests in build pipelines.

I look forward to your reply.

Sincerely,

Soumya Prasad
