Summary

I am an engineer, with several years of experience within various areas of product testing. I enjoy automating tests, and in the process, refine the product and its value, always, with the end user in focus. Continuously collaborating with developers, product owners, account managers and testers - to best align with the use-case, while at the same time maintaining a high code coverage, are my strengths.

I am working as a **Senior Test Consultant** at **B3 Innovation AB** since January 2021, I am currently contributing in a TestOps role in an internal React Native project, working with Android/iOS testing with Appium, Selenium WebdriverIO, ReactJs application testing with Cypress and Google Firebase integrations, X-Ray-JIRA integration and bitbucket pipelines. I was recently certified as SAFe 5.0 Agilist and working on my ISTQB certification.

I am familiar with post trade solutions and trading platforms in general(With hands-on knowledge of clearing technology for stock exchanges). I have also briefly worked with IoT sensor networks and for several years in industrial automation.

In my upcoming assignments as a senior consultant I look forward to applying my broad experience in various aspects of Quality Assurance, coaching, test planning and driving testability in exciting projects. I thrive working in cross-functional teams.
